## **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 28, 2011 has been entered.

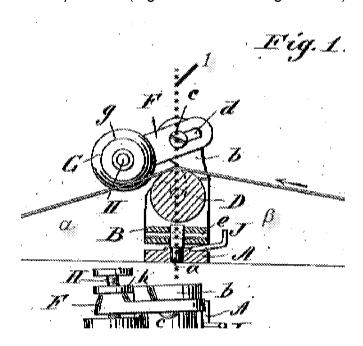

## Claim Rejections - 35 USC § 102

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Albey (US-0270718). Regarding Claim 1, Albey disclose an elongate material path guide capable of guiding yarn comprising a guide roll D; and a supporting member B that supports the guide roll, the supporting member having a rotating shaft a at a position twisted at a right angle to a rotating shaft (shown but not numbered at the center of D) of the guide roll, and wherein a fiber bundle is capable of being guided automatically in an original elongate material (or yarn) path direction by inclining the guide roll with respect to the elongate material (or yarn) path when the guide roll is rotating around the

Application/Control Number: 10/586,413 Page 3

Art Unit: 3654

rotating shaft of the supporting member in response to variation of the elongate material (or yarn) path, when an angle between the rotating shaft of the supporting member and the original elongate material (or yarn) path enter the guide roll is  $\alpha$  ( $\alpha$  is approximately 45°) and an angle between the rotating shaft of the supporting member and the original yarn path coming out of the guide roll is  $\beta$  ( $\beta$  is just short of 90°), and the elongate material (or yarn) is capable of being set up so that  $\alpha$  and  $\beta$  have the relation  $\alpha \ge 45^\circ$ ,  $\alpha < \beta$ , and  $\alpha + \beta < 180^\circ$  (Figure below and Figures 1-3).

Regarding Claim 2, Albey disclose an axis 1 of the rotating shaft of the supporting member crosses the original yarn path at one portion (Figure above and Figures 1-3).

Claim Rejections - 35 USC § 103

Art Unit: 3654

Claims 4-5 and 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nojiri et al. (US-5499776) in view of Albey (US-0270718). Regarding Claim 4, Nojiri et al. discloses a manufacturing apparatus 1,2,3,4 of a fiber bundle package P comprising yarn path guides 2<sub>1</sub>,2<sub>2</sub>,2<sub>3</sub>,2<sub>4</sub>,2<sub>e</sub> (Figures 1-8). Nojiri et al. does not expressly disclose the yarn path guide of Claim 1.

However, as advanced above, Albey teaches the yarn path guide of Claim 1 (Figure above and Figures 1-3). Because both Albey and Nojiri et al. teach yarn path guides, it would have been obvious to one of ordinary skill in the art at the time of the invention to substitute the yarn path guide of Albey for the yarn path guide of Nojiri et al. to achieve the predictable result of guiding the yarn as taught by Nojiri et al. and to maintain the alignment of the yarn as taught by Albey.

Regarding Claim 5, Nojiri et al. disclose a method of manufacturing the fiber bundle package of Claim 4 comprising supplying a fiber bundle F to the yarn path guide (Figures 1-8).

Regarding Claims 7-8, Nojiri et al. disclose a fiber bundle traversing device comprising a traverse guide 2 capable of guiding the fiber bundle F and a traverse mechanism 6,7,8 of the traverse guide, capable of traversing the fiber bundle by reciprocating the traverse guide in the direction of a bobbin rotating shaft 3 by the traverse mechanism, wherein the traverse guide has yarn path guides 2<sub>1</sub>,2<sub>2</sub>,2<sub>3</sub>,2<sub>4</sub>,2<sub>e</sub> capable of guiding the fiber bundle. Nojiri et al. does not expressly disclose the yarn

Art Unit: 3654

path guide of Claim 1 wherein the rotating shaft of the supporting member crosses the center of the yarn path.

However, as advanced above, Albey teaches the yarn path guide of Claim 1 wherein an axis 1 of the rotating shaft of the supporting member crosses the center of the yarn path (see rejection of Claim 2) (Figure above and Figures 1-3). Because both Albey and Nojiri et al. teach yarn path guides, it would have been obvious to one of ordinary skill in the art at the time of the invention to substitute the yarn path guide of Albey for the yarn path guide of Nojiri et al. to achieve the predictable result of guiding the yarn as taught by Nojiri et al. and to maintain the alignment of the yarn as taught by Albey.

## Response to Arguments

With respect to Applicant's arguments starting on page 3, line 12 to page 5, line 2, Applicant argues Swanke and Nojiri, alone or in combination do not disclose or suggest the angle  $\alpha \ge 45^{\circ}$ . Applicant's arguments with respect to claims 1-2, 4-5, and 7-8 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM E. DONDERO whose telephone number is (571)272-5590. The examiner can normally be reached on M - F 7 AM - 4:30 PM.

Application/Control Number: 10/586,413 Page 6

Art Unit: 3654

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael R. Mansen can be reached on 571-272-6608. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/WILLIAM E DONDERO/ Primary Examiner, Art Unit 3654
